***Examiner's Amendment***

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this Examiner's amendment was given in a telephone interview and/or FAX request with Mr. John W. Bailey on March 14, 2007.

The application has been amended as follows:

- Claim 1, line 8: before "the squareness", the word "and" was deleted; and
  - Claim 1, line 9: at the end of the claim, after the word "more", the following phrase was inserted: "; a Young's modulus of the lower non-magnetic layer is 60 to 99% of a Young's modulus of the upper magnetic layer; and a Young's modulus of the intermediate binder layer is 10 to 60% of the Young's modulus of the upper magnetic layer".

***Reasons for Allowance***

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious the claimed structure wherein the relative Young's modulus values are controlled to meet Applicants' claimed limitations.

While the prior art of record is deemed to disclose the general structure of a lower non-magnetic layer, an intermediate layer consisting essentially of a binder for

improved adhesion, and an upper magnetic layer, the Examiner notes that the prior art of record fails to teach or render obvious controlling the relative Young's modulus values to within Applicants' claimed ranges. The Examiner further notes that while it is known in the coating-type magnetic art that the Young's modulus of the layers can impact the magnetic and running properties of the medium, the prior art of record fails to recognize the improvement in uniformity of the magnetic layer observed by Applicants upon utilizing Young modulus values within the claimed ranges. As such, the Examiner deems that one of ordinary skill in the art would not have been motivated to optimize the Young's modulus values to within the claimed ranges, since the prior art failed to recognize the importance of the claimed ranges.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
